About Mink Extensions:

The mink eyelash extensions are placed individually on each of your own natural lashes with a special medical-grade adhesive. Your eyes are closed throughout this entire painless and relaxing process. In fact most people fall asleep! The extensions will last anywhere from 2-6 wks depending on the growth cycle of your lashes and how well you take care of your extensions. The extensions will shed when the natural lash that it is attached to, is ready to shed. This shedding process is a natural part of your eyelash growth cycle. It is recommended that you maintain your beautiful, new lash extensions with a fill every 2-4 weeks to fill in the "gaps" made by the shedding process between your natural lash and the extensions.

About Robyn:

Robyn is a licensed master cosmetologist in the state of Georgia. She focused her attention on lash extensions after becoming addicted herself. Robyn specializes in synthetic mink extensions as she feels that they provide the most beautiful, natural look while preserving the integrity of the natural lash. Compared to the typical lash extension, they are feather-light, softer, and more glamorous. She doesn't "count" lashes like other extension technicians but rather customizes extensions to fit your needs. Whether you are going for a "natural" look and just want to slightly thicken/lengthen your lashes, or the "glam" look and want to be red-carpet-ready, she will work with you to achieve your desired look.
